OPEN POSTDOCTORAL POSITION / 2015

SOLUTIONS FOR PASSIVE AND ACTIVE NOISE CONTROL

A postdoctoral position is open at FEMTO-S, department of Applied Mechanics, Besançon, France. The research of the team focuses on passive and active solutions for noise control. The laboratory is looking for an organized and motivated individual, who can accomplish a number of projects in vibroacoustics.

Requirements:
A successful applicant should have a Ph.D. degree awarded by an internationally recognized institution and should have a proven track record in research and laboratory work in the form of publications in recognized peer-reviewed international journals. Experiences in passive noise control are required. Prior experience in active control research is desirable, but not mandatory.

Applicants should email his/her full curriculum vitae, a brief summary of research experience and contact information (email and phone number) of at least two references to: Prof. Morvan OUISSE (morvan.ouisse@femto-st.fr).
