

## **Postdoctoral Position on Acoustic Metamaterials**

We are seeking a full-time postdoctoral research assistant to join the group of “Phononics and Acoustic Metamaterials” within the “Institut Jean Lamour” at the University of Lorraine – CNRS in France. The post is fixed-term for 1 to 2 years. The candidate must have excellent skills in theoretical and numerical methods/models dealing with wave propagation in complex media. She/he has to have good knowledge of underlying physics of wave propagation in phononic and metamaterial structures. Applications in terms of low frequency sound/vibration isolation will be investigated.

**Lieu:** Institut Jean Lamour, CNRS – Université de Lorraine (Nancy).

**Rémunération :** 2100 euros net / mois

**Durée :** 12 mois à 24 mois

**Début souhaité :** Octobre 2014

**Financement:** Europe

**Contact:** Badreddine ASSOUAR
